PROFILE

Fullstack Developer with a strong focus on Node.js and Next.js, building scalable web applications and RESTful APIs. CEO and co-founder of a Geez language learning platform. A2SV-trained with 380+ LeetCode problems solved and hands-on experience leading development teams on production systems.

EXPERIENCE

CEO & Co-founder – Geez Learning Platform

2025 – Present

- Founded and lead a full-featured online language learning platform for Geez, owning the full product from architecture to deployment.
- Built a multi-course system with structured lessons, quizzes, and personalized progress tracking per learner.
- Designed a multi-role user management system (admin, instructor, student) with secure authentication and access control.
- Led all technical decisions, product roadmap, and team coordination as CEO.
- Stack: Next.js, Node.js, PostgreSQL, JWT authentication.

Backend Developer Intern – AA City Court Management System

2025 – 2026

- Contributed to backend development for a city-level court case management platform serving Addis Ababa municipality.
- Built REST APIs and implemented JWT-based authentication and role-based access control.
- Managed database design for case records, user accounts, and court schedules in a multi-user environment.
- Collaborated with frontend developers and stakeholders to deliver features on schedule.
- Stack: Django, REST APIs, JWT, PostgreSQL.

Fullstack Developer (Contract) – Distribution Management System

Jan 2026 – Mar 2026

- Developed a full distribution company management system for a private client, handling inventory, orders, and logistics workflows.
- Built both frontend and backend, implementing business logic, database models, and user-facing dashboards.
- Stack: Next.js, PostgreSQL, BetterAuth, shadcn/ui.

Co-founder & DSA Mentor – Nexus Tutorials

2025 – 2026

- Co-founded a community-driven platform teaching data structures, algorithms, and full-stack development.
- Mentored students through LeetCode-style challenges, coding best practices, and algorithmic problem-solving.
- Delivered structured tutorials, exercises, and mock coding interviews to strengthen student outcomes.

EDUCATION

B.Sc. in Computer Science – Addis Ababa University

2022 - 2026

- Relevant coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Web Development, Cloud Computing, Networking, Software Development, Computer Architecture, Algorithms & Complexity.

Algorithmic Problem Solving & Software Engineering – A2SV (Africa to Silicon Valley)2024 – 2025

- Intensive training in advanced data structures, algorithms, and software engineering best practices.
- Solved 380+ LeetCode problems with focus on medium-to-hard difficulty; strong proficiency in algorithm optimization and complexity analysis.

PROJECTS

Agri Market AI Decision Support System

- AI-powered platform analyzing agricultural market data to provide farmers and traders with actionable insights for buying, selling, and crop planning.
- Built predictive models using XGBoost for price and demand forecasting; integrated Gemini API for multilingual translation support.
- Implemented dashboards to visualize market trends and optimize buying/selling decisions.
- Stack: Node.js, Express, Python, XGBoost, Gemini API, PostgreSQL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS, Java

Frontend: Next.js, React, Nuxt.js, Vue.js, shadcn/ui, Tailwind CSS

Backend: Node.js, Express, REST APIs, JWT, BetterAuth, Middleware, Django

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Redis

DevOps & Tools: Git, GitHub, Docker, Postman, Vercel, CI/CD pipelines

AI & LLM: Prompt engineering, LLM integration (Gemini, OpenAI), XGBoost, AI/ML fundamentals, LangChain basics

DSA: 380+ LeetCode problems solved, Algorithm optimization, Complexity analysis

Other: System design, Team leadership, Mentorship, Agile workflows

LANGUAGES

English: Fluent

Amharic: Native

Geez: Proficient
